Livestock, Poultry, and Grain Market News

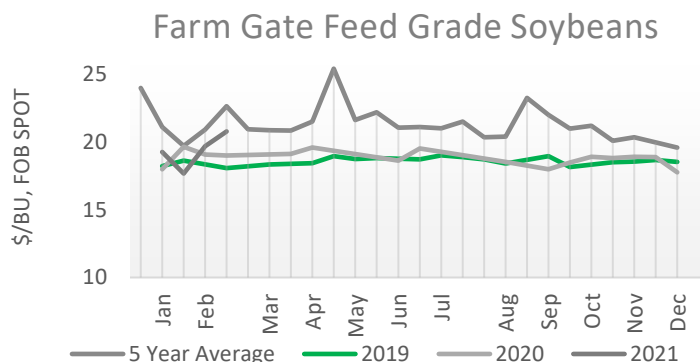

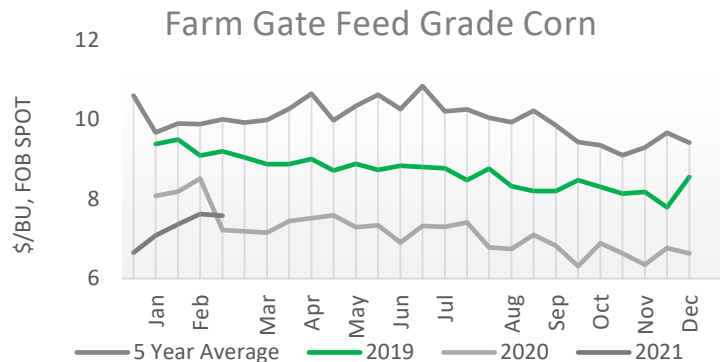

March 10, 2021

## Grain and Feedstuffs Market Trend

Compared to two week's ago: Trade activity and demand good for feed grade organic corn and soybeans. Organic feed grade corn traded 4 cents lower FOB than the prior period with the bulk of activity on forward contracting. Organic feed grade soybeans traded 1.09 higher FOB. Cash bids were higher this period due to the lack of imports on organic soybeans and soybean meal from India. Trade inactive on all other organic grains. The next available report will be Wednesday, March 24, 2021.

## Current National Drought Summary (March 2, 2021)

The current U.S. Drought Monitor period was highlighted by a large swath of heavy rain that started in northeast Texas and progressed northeast into the Mid-Atlantic. In this area, widespread reports of 200-400% of normal precipitation took place, with some areas of Kentucky having widespread 6-8 inch amounts. Dry conditions dominated much of the West and especially the Southwest and into the Plains. Some active weather in the Pacific Northwest and northern Rocky Mountains brought with it rain and snow, helping to boost seasonal snow totals. Temperatures during the week were cooler than normal over the West with departures of 6-9 degrees below normal widespread, while temperatures were above normal from the Plains eastward with departures of 9-12 degrees above normal over much of Alabama.
